

Transas Charts Service Guide

1. General

Transas publishes the following chart collections:

TADS - Transas Admiralty Data Service. TADS contains:

- SENC Cells – System Electronic Navigational Charts - charts are produced by countries which approve SENC distribution
- ENC Cells – Electronic Navigational Charts - charts are produced by countries which do not approve SENC distribution
- AIO Cells - Admiralty Information Overlay - provides access T&P notices from Admiralty Notices to Mariners

TX-97 - TRANSAS TX-97 Electronic Vector Charts are produced from chart data published by National Hydrographic Offices.

TADS and TX-97 are published every 3 (three) months on Base Issue medias; the updates are published on Update medias every week. There are different ways of obtaining the charts and updates data, that depends on availability of Internet connection.

2. Charts Collections

3.2 Chart Corrections

http://www.transas.com/support/chart_corrections/ - used by customers who have TX-97 and professional maintenance service and who do not use the Online Update opportunity provided by Chart Assistant. The Updates include Notices to Mariners only.

3.3 Correction files for Chart Assistant

http://www.transas.com/support/chart_assistant/ - used by TX-97 and TADS customers, who are use Chart Assistant or Navi-Planner as tools for online updates. They include both, Notices to Mariners and charts new editions. These images should be used for the first supply of the charts only and are intended to synchronize onboard chart collections with the latest weekly update issue. After these files have been installed, all charts will be updated to the most recent version and therefore the size of updates received online will be significantly smaller.

Note - these correction files shall not be used for weekly updating and can be used only once for one WF issue.
